

Huzaifa Imran

Web Developer | AI Automation | Programming

+92 334 7327761 | huzaifaimran309@gmail.com | Karachi, Pakistan

PROFESSIONAL SUMMARY

Dedicated and results-driven individual with hands-on experience in web development, AI automation, and programming. Currently serving as a Mathematics Faculty Member at Time Collegiate, demonstrating strong communication and instructional skills. Recognized for creative problem-solving, efficient multitasking, and a passion for continuous learning. Seeking opportunities to contribute technical expertise and innovative thinking to a forward-looking team.

EXPERIENCE

Mathematics Faculty Member

Present

Time Collegiate, Karachi

- Deliver engaging mathematics instruction to students, simplifying complex concepts.
- Develop lesson plans and assessments to monitor student progress.

PROJECTS

2D Pen Plotter

Hardware + Software Project

- Designed and built a 2-axis CNC pen plotter capable of drawing vector graphics on paper with high precision.
- Implemented motion control using stepper motors, motor driver modules (A4988), and G-code interpretation via GRBL firmware.
- Developed a Python-based GUI to convert SVG/image inputs into G-code toolpaths and stream commands to the Arduino controller.
- Integrated limit switches for homing routines and calibrated axis movement for accurate millimeter-level positioning.

AI-Powered Study Assistant Chatbot

AI & Automation Project

- Developed a chatbot using prompt engineering and LLM APIs to assist students with subject queries, quiz generation, and study material summarization.
- Integrated automated response flows to handle multiple student queries simultaneously, improving efficiency.

Automated Data Entry & Report Generation Pipeline

Automation Project

- Built an automation workflow using Make (Integromat) that collects form submissions, validates data entries, and generates formatted reports automatically.
- Eliminated manual data entry tasks and significantly reduced errors in report generation.

Personal Portfolio Website

Web Development Project

- Designed and developed a fully responsive personal portfolio website using HTML and CSS.
- Applied clean UI/UX principles ensuring consistent, engaging experience across devices.

TECHNICAL SKILLS

Web Development: HTML, CSS

Programming: C Language, Python (basic), Arduino/GRBL

AI & Automation: n8n, Make (Integromat), Prompt Engineering, LLM APIs

Hardware: CNC/Pen Plotter, Stepper Motor Control, G-code, A4988 Drivers

Data Management: Data Entry, Report Generation, Automated Pipelines

Editing: Video Editing, Document Editing

EDUCATION

Bachelor's Degree (Ongoing)

Bahria University, Karachi

Intermediate (F.Sc.)

DJ Science College, Karachi

Matriculation

Hill Crest School, Karachi

80% — Recipient of 'Student of the Year' Award

LANGUAGES

Urdu: Native Proficiency

English: Fluent Proficiency

INTERESTS

Reading Novels | Football

Video & Document Editing | Gaming
